Burj Al Rumaila Company is a leading company specialized in providing integrated solutions in four main sectors: energy projects, oil, housing, and construction. The company was established in 2004 with the aim of providing high-quality services that meet the needs and aspirations of its customers in various vital industries. Thanks to its specialized work team and extensive experience, Burj Al Rumaila Company seeks to achieve the highest standards of efficiency and innovation in the implementation of major projects, which contributes to the development of infrastructure and strengthening the national economy in the country. The company focuses on providing innovative and sustainable solutions in both the energy and oil sectors, where it plays a pivotal role in the implementation of projects of strategic importance and contributes effectively to meeting housing and construction needs by providing advanced designs and high-quality construction services, which enhances its position as a reliable partner in the development of urban and industrial projects alike.

## 03 Our Vision & Mission

 **Our Vision:** Burj Al Rumaila Company seeks to be at the forefront of leading companies in providing integrated and innovative solutions in the energy, oil, housing, and construction sectors at the local and regional levels.

 **Our Goal:** Burj Al Rumaila Company focuses on achieving excellence in providing its services through innovation and high quality in project implementation. The company aims to meet the needs of its customers with the best possible solutions, and enhance operational and economic efficiency in energy, oil, housing and construction projects. It also seeks to contribute effectively to achieving sustainable development by adopting the latest standards and technologies in all stages of project implementation.

| ❑ Manifolds Erection & Dressing | ❑ Wellheads Hook Up & Tie-In                      |

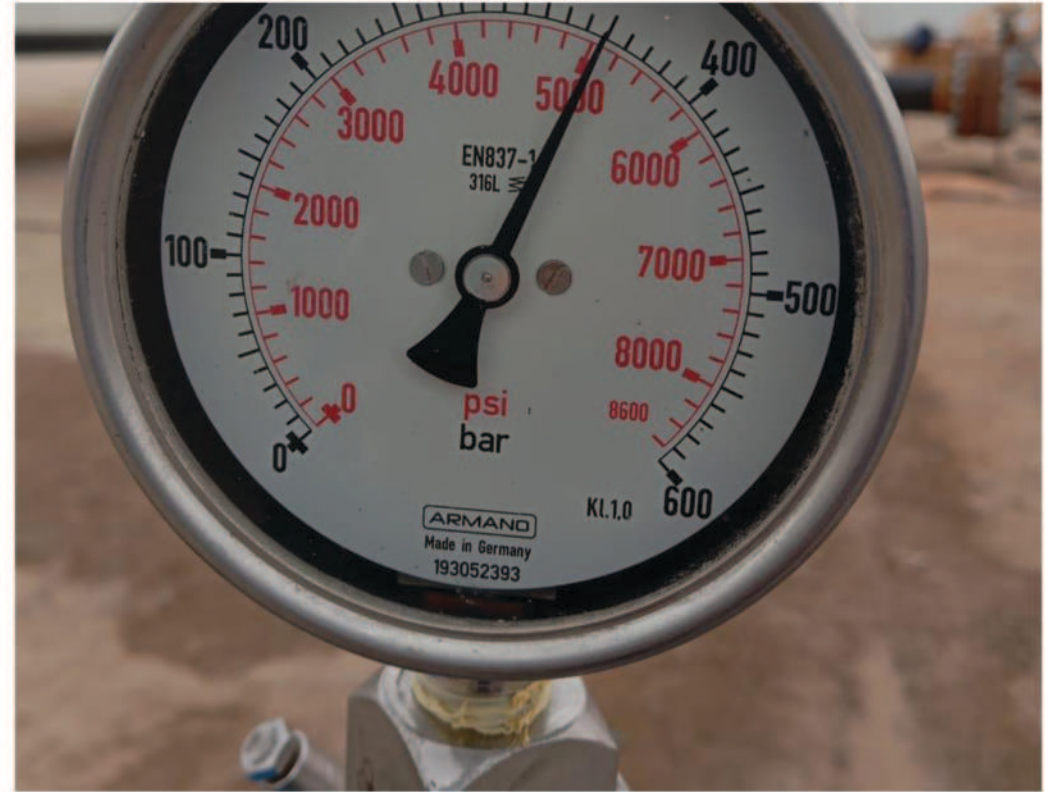

Burj Al Rumaila Company is one of the leading engineering, procurement and construction companies in Iraq in the field of oil and gas field services. We provide engineering, procurement, construction, structural and civil works, fabrication, welding, testing, sandblasting, painting and installation services (internal) to the Iraqi Ministry of Oil and international oil companies.

Burj Al Rumaila Comany specializes in pipelines and is the most reputed contracting company having completed many pipeline projects all over Iraq. Our company executes pipeline projects , which include supply, welding , hot wrapping, installation, lowering and fixing, and hydrostatic testing. We apply new technology such as GPS to all surveying work for accuracy. We have a reputation for completing projects within budget, ahead of schedule, and in compliance with the high standards set by our clients and the government.

## 07 Inspection/NDE/Hydrostatic Test

Burj Al Rumaila Co. Is having a solid quality control procedures and professional team, our inspectors are CSWIP and BGAS certified for welding, coating inspection and safe to control the hydrostatic and leak test operation. For NDT Burj Al Rumaila having a contract with NDT Inspection services companies for providing NDT services such as Gama-Ray, PAUT, X-Ray, MPI, PT, UT & Long Wave UT, RMS (Rapid Motion Scan) and Video Paro Scope.

Burj Al Rumaila Comany is erecting storage tanks in according to API 650 including the surveying, excavation, framework and re-bars for casting the foundation as well as the construction and welding the shell, floating roof, grit blasting and painting. We do all the required tests for the Storage tank such as NDT, Vacuum, DST and Leak test.

## 09 Trenchless Crossing (Auger Boring)

It is a horizontal underground drilling technique without the need to dig surface trenches, used to pass pipes or cables under infrastructure such as roads and railways without disturbances on the surface.

- Advantages :**
- ✓ **No Surface Drilling:** Reduce environmental damage and save cost
  - ✓ **High Accuracy:** Accurately guide the drill to pass pipes or cables

- The process :**
- ✓ Drilling the starter hole
  - ✓ Horizontal drilling and soil removal
  - ✓ Installing drilling equipment
  - ✓ Pipe insertion and finishing work

Burj Al Rumaila Co. Have professional electrical & Instruments staff that can do installation for I/O and PLC panels, Flow meters, Flow indicators, Pressure transmitters, Temperature transmitters and junction box. All instrument cables are laid end-to-end and subjected to resistance and continuity tests.

### Other features and systems we offer:

- ✓ Flow meter modification PLC control
- ✓ Add new digital input signal
- ✓ New Logic development calculate system
- ✓ Design, supply and installation of cathodic protection systems
- ✓ HMI/SCADA development to show all the values
- ✓ Lighting power cable, Lighting luminaires, and Lighting photocells
- ✓ Lighting control panel and wiring installation and termination

Burj Al Rumaila has a well-trained and professional team with experience and high reputation in designing and implementing civil works. The company has all the necessary equipment and supplies to implement civil works with the highest levels of quality and safety according to international standard specifications.

- ✓ **Bridge Design:** Burj Al Rumaila Co. Provides innovative design solutions based on advanced technologies to ensure the sustainability and structural strength of bridges.
- ✓ **Distinctive Architectural Design:** Burj Al Rumaila offers modern and innovative residential designs that suit the needs of customers, taking into account aesthetics and practical functions. For homes.
- ✓ **Customized Solutions:** The company offers customized housing solutions based on individual customer requirements, whether it is in design, budget or project size.
- ✓ **On-Time Project Delivery:** Burj Al Rumaila is committed to delivering civil projects on time without compromising on quality, providing clients with a smooth and hassle-free construction experience.

Burj Al Rumaila uses the latest technology and software to maximize field productivity and produce high quality, fast output. We have built our reputation on providing an understanding of the geospatial landscape. Our oil and gas survey teams are equipped, staffed and equipped for projects of any size and complexity, including pipelines and exploration and production projects. Our qualified team can locate pipelines using modern GPS equipment and all other survey work required for projects.

### Our Occupational Health and Safety Management

The Occupational Health and Safety Program will play an important role in reducing work - related injuries, illnesses and fatalities through proactive preventive strategies and policies that aim to protect and promote workers' rights in a safe and healthy work environment

### Examples used by our employees at work sites include:

- ✓ Safety glasses (protect from splinters, dust and lights).
- ✓ Ear protection (protects ears from noise damage).
- ✓ Hard hat (reduces head injury).
- ✓ Toe safety shoes (protect feet from rolling, falling, or any crushing actions).
- ✓ Safety gloves (reduce hand injuries).
- ✓ Safety vests (to prevent unwanted injury).
- ✓ Seat belts (used in high places).

HEALTH

SAFETY

ENVIRONMENT

### Our Occupational Health and Safety values include:

The Occupational Health and Safety Program operates on the basis that our customers are the sole reason for our existence and we will perform our duties in a manner that demonstrates respect for all persons / employees, and effective, efficient, effective and accountable services to our customers at all times. Our Occupational Health and Safety Program includes in our action plan the following objectives in the Self - Regulation Policy in Public Works Raising the level of awareness of occupational health and safety in the public sector. Equipping and improving the resources and enhancing the capabilities of occupational health and safety personnel through training, marketing, communications, systems, information technology, statistics and research

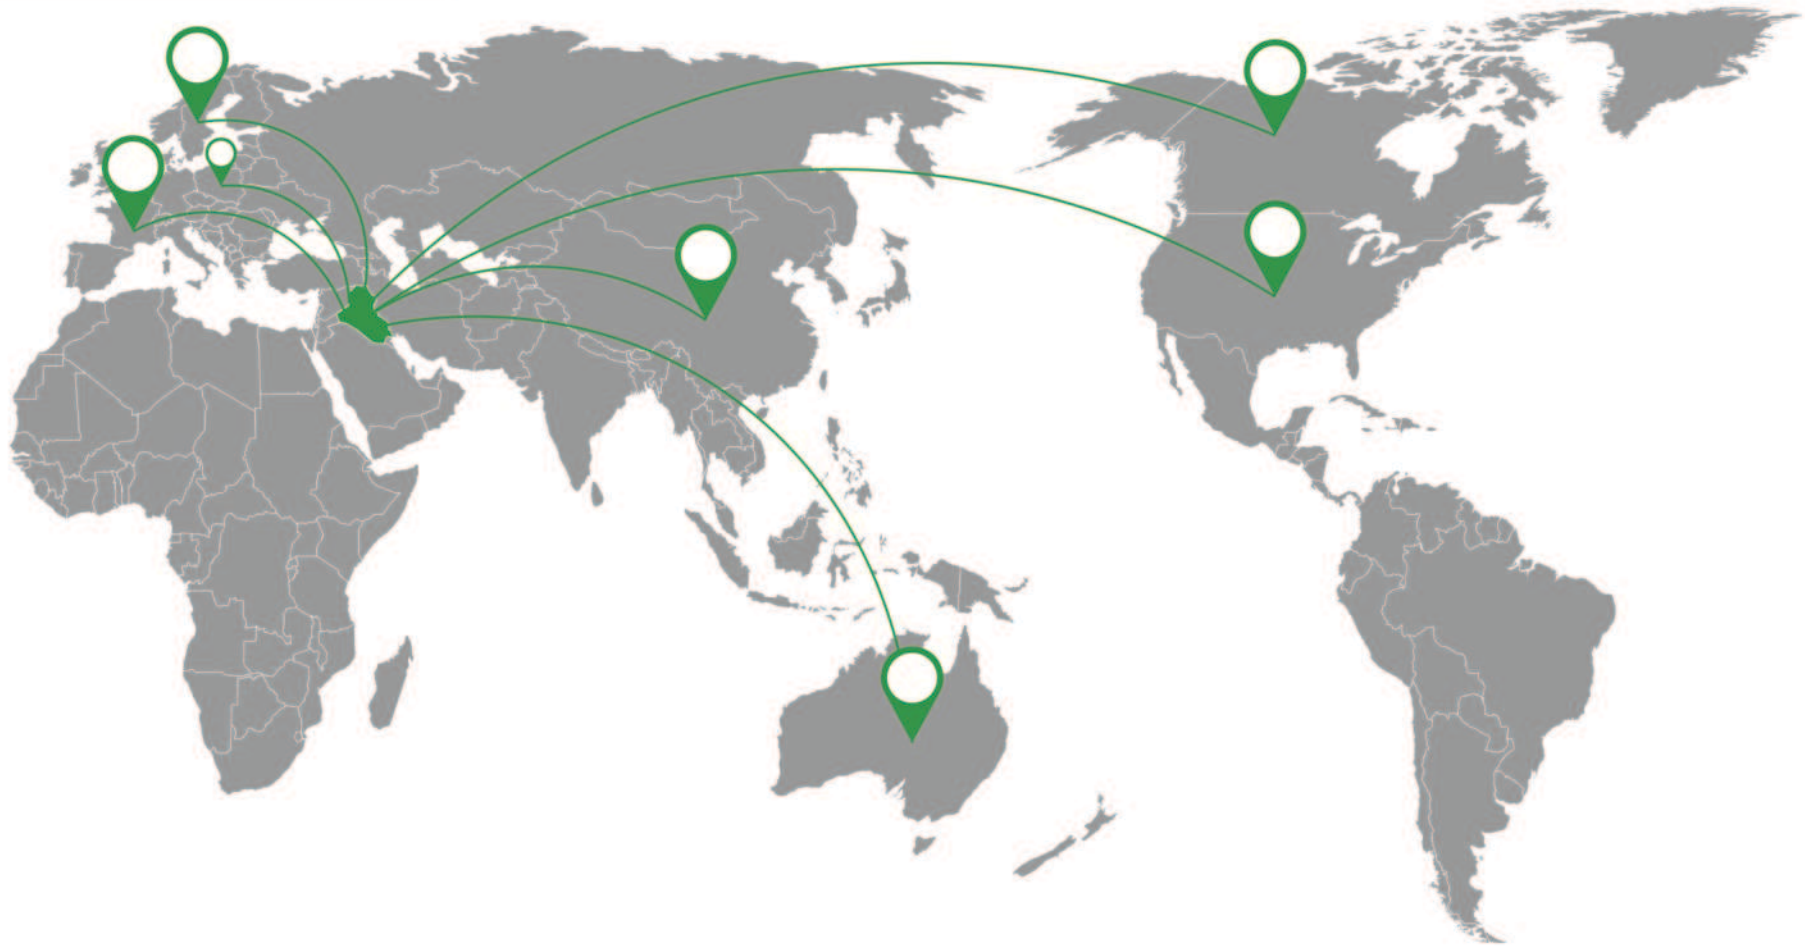

Burj Al Rumaila is committed to providing high-quality contracting services that meet the expectations of our customers and achieve the highest levels of satisfaction. To ensure and monitor quality, we implement a comprehensive system that starts with careful planning of projects, which includes preparing detailed plans for each stage, and ensuring the use of materials and tools that comply with international standards.

We are keen to implement a comprehensive quality management system in accordance with international standards such as ISO 9001, which allows for continuous improvement of processes and achieving sustainable quality. Suppliers and partners are carefully selected to ensure the use of high-quality materials, and all materials are carefully inspected before being used in projects.

On site, continuous supervision is carried out by specialized engineers to ensure that work is carried out accurately according to the required technical standards. Periodic tests are conducted on materials and facilities to ensure their safety and quality.

In Burj Al Rumaila, we believe in the importance of continuous training and development for employees and workers, so we provide them with training courses to enhance their skills and update their knowledge of the latest construction technologies. Periodic reviews are also conducted to evaluate and continuously improve operations, with a focus on customer satisfaction and taking their feedback into consideration.

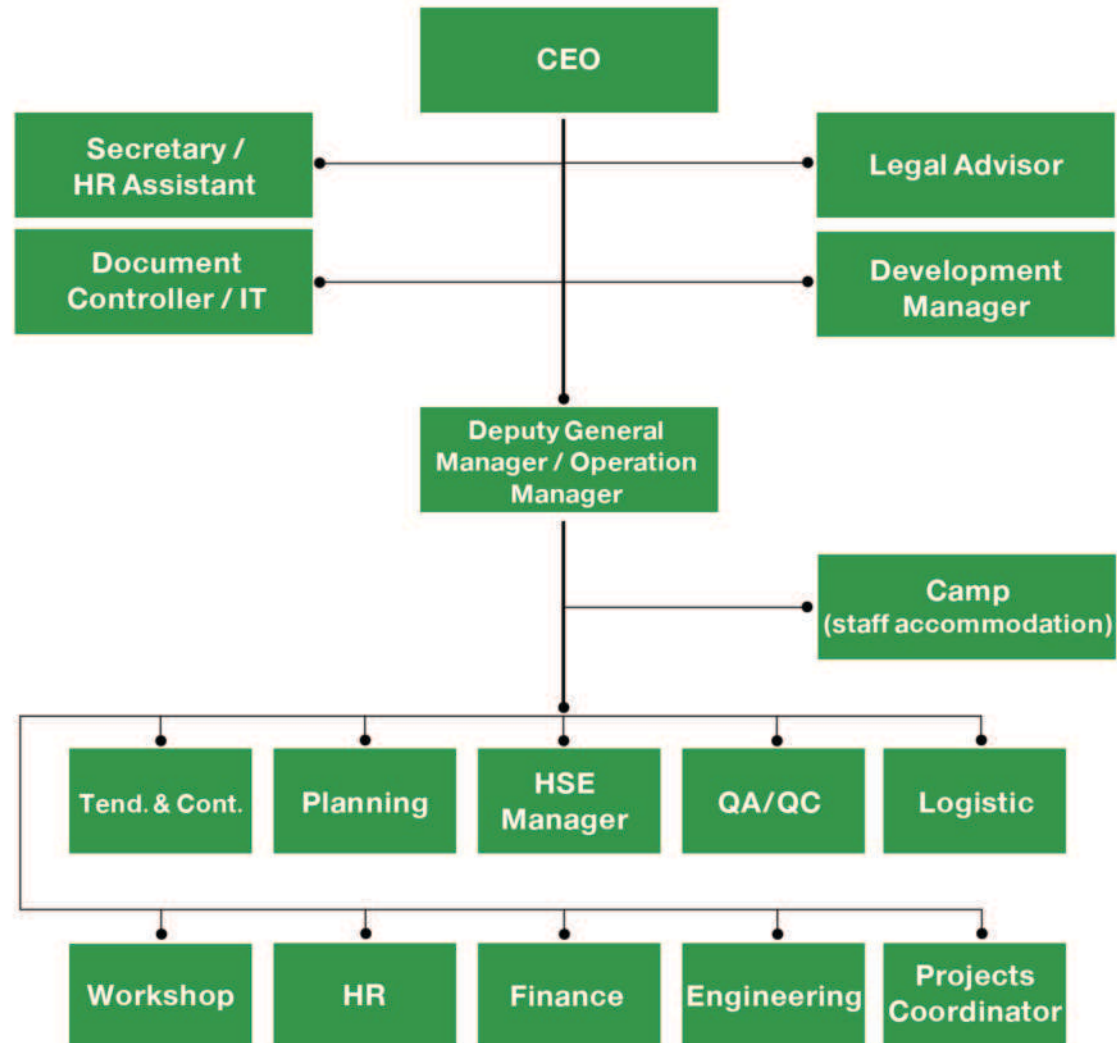

We import our materials from the best suppliers in USA, Europe & many other well-known countries. We deliver innovative, effective and successful projects and programmes that made us achieve our Mission and Vision. Our extensive range of high-quality products, industry experience and local stock will enable us to address all your needs efficiently and effectively. Our customer base includes, among others, companies in Oil & Gas, Power & EPC industries, we will be in position to provide you with the best prices and aftersales services. Our Procurement Team consists of highly qualified procurement professionals. It manages all types of request – whether engineered equipment for EPC Projects, or off the shelf items that needed for operationing the company, or the engagement of specialized consultant that would optimize your project value.

No.	Projects
1	Qayyarah Bridge Reconstruction Project
2	Construction of a 25-house residential complex in Hay Al-Masafi
3	Construction of a tank in Salah Al-Din refinery
4	Construction of a tank at Baiji gas station
5	Extending an 8-inch pipe, 8 km long, from Baiji refinery to Al-Siniyah refinery
6	Connecting the electricity grid to the grease refinery
7	Construction of the civil engineering building in the refineries district
8	Construction of a 500 m2 gable roof in Baiji refinery
9	Pipeline network works in Haditha refinery
10	Establishment of two salt water storage tanks in Kirkuk refinery
11	Construction of 15 bridges on Al-Zawiya Road

No.	Projects
1	57 km, Kurdistan Gas Pipeline, size 24" – KAR Group Project
2	Industrial Water Pipes - SIDCCO
3	Piping for Fire Fighting System - SIDCCO
4	Construction of 6 storage Tanks - SIDCCO
5	30 Km, GAS Pipeline, size 16" - Ahdeb Oil Field
6	30 Km, Crude Oil Pipeline, size 10" - Ahdeb Oil Field
7	Construction in total of 53 Km, Production Flow Lines, size 6" - Ahdeb Oil Field
8	GAS Pipeline Size 16" & Crude Oil Pipeline Size 10", 30KM each - Ahdeb Oil Field
9	27 Crude Oil Production Flow lines, Total 118 Km - Rumaila Operating Organization / BP Iraq
10	Dressing Production Manifold – 15 Slots at DS09 - Rumaila Operating Organization / BP Iraq
11	Water Injection Pipeline, size 24" at K44 Total 11Km - Rumaila Operating Organization / BP Iraq
12	Erection of 200 NOS of Crude Oil WH Skids - Rumaila Operating Organization / BP Iraq
13	43 Crude Oil Production Flow lines – Total 215 Km - Rumaila Operating Organization / BP Iraq
14	CPS6 Temporary Pumping Project – Weatherford / Rumaila Operating Organization / BP Iraq
15	Crude Oil Trunk Line 18" to PM-400 & PM-300 at DS02 – Rumaila Operating Organization / BP Iraq

## 18 Photos From Our Works

Burj Al Rumaila has a distinguished workforce that includes a group of highly experienced and qualified technicians and engineers. These individuals are distinguished by their specialized skills and their ability to provide innovative and effective solutions in our company's areas of specialization.

 General Manager No. 1	 Project Manager No. 3	 Civil Engineer No. 8	 Electrical Engineer No. 4
 Mechanical Engineer No. 16	 Quality Engineer No. 6	 Work supervisor No. 9	 HS&E Employee No. 16
 Surveyor No. 3	 Technicians No. 33	 Drivers No. 36	

## 21 List of Equipments

Burj Al Rumaila is constantly investing in new equipment, keeping pace with the latest innovations, methods and developments in the field of construction. We are keen to purchase new and modern equipment to facilitate the implementation of our work and projects in a sound manner and with satisfactory results. Today, the company owns a wide range of equipment that includes:

NO.	Equipment	Qty	Description	NO.	Equipment	Qty	Description
1	CAR	8	SUV	17	BULLDOZER	4	_____
2	PICKUP	16	HILUX	18	COMPACTOR	6	_____
3	BUS	8	14 SEAT - 24 SEAT	19	GRADOR	2	_____
4	WELDING TRACTOR	26	TRACTOR WITH CART	20	PAUT	2	VEO+ 16:64PR / 2UT :PR WITH TOFD
5	MAN LIFT	4	1/4TON - 1TON	21	INTERNAL PIPE BLASTERS	8	Blast & Clean Pipe
6	FORKLIFT	4	2TON - 12TON	22	SPINNER BLAST	6	Cleans The Interior Pipe
7	PIPE FORKLIFT	5	3TON - 6TON	23	INTERNAL PIPE COATER	4	Painting Pipe
8	FLATBED TRUCK	6	10TON - 40TON	24	BORING MACHINE + HDD	7	THURST BORING
9	BOOM LORRY CRANE	10	2TON - 20TON	25	GENERATOR	36	20KV - 350KV
10	BOOM CRANE	5	1.5TON - 3TON	26	AIR COMPRESSOR	20	80CFM - 760CFM
11	MOBILE CRANE	6	50TON - 100TON	27	INTERNAL CLAMP MACHINE	3	CLAMPING
12	WHEEL LOADER	8	3TON - 6TON	28	PIPE BENDING MACHINE	2	PIPE BENDING
13	SIDEBOOM CRANE	11	1TON - 40TON	29	HYDROSTATIC TESTING UNIT	2	TISTING UNIT
14	PAYWELDER	3	_____	30	LATHE MACHINE	3	LATHING
15	BACKHOE LOADER	3	1TON - 5TON	31	TORQUE MACHINE	5	TORQUING
16	EXCAVATOR	6	_____	32	TENSION MACHINE	5	TENSIONING
